Skills

User Research & Testing

Personas | User Shadowing | User Interviews | A/B -Multi Variant Testing | Eye tracking | Surveys | Analytics

Storyboarding, Prototyping & User Flows

Sketching, rapid prototyping with Axure

Visual Design

Sketch | Illustrator | Photoshop | Adobe XD

Good command of

HTML, CSS, Wordpress.org

Good understanding of

Front and back-end technologies

Work Methodologies

Agile - Scrum

Design Thinking "Google Sprints" in 5 days

Currently learning Service Design

Work Experience

Creative Technologist

(6 months) - July 2017 to present

Tata Consultancy Services, London, UK

- Helping clients reaching the next innovation level by creating digital customer experience POC (Proof of Concept or prototypes) with all latest technologies like Internet of Things, Artificial Intelligence, Robotics, Drone technology and more.
- Quick ideation and prototyping in a pre-sales process to win new contracts
- Currently designing and managing remote team for the development of an app on Android and iOS for a renown retailer related to payment methods.

UX Designer

(2,5 years) - January 2015 to present

Freelance, France

- UX consultancy for Cognizant: Prototyping of an MVP for a Pocket Money Wallet mobile app for children, Worked with an Android developer and a product manager. Benchmarking with the competition. Deliverables: User research, User flows and Assumptions, Site Architecture, Mobile Interactive Prototype for later testing.
- Leading the redesign of an online dictionary on Dream Interpretation Symbols for a psychotherapist. From sales, weekly meetings with client, User research (Tree testing and Card sorting with Optimal Workshop). Mobile first approach: I prototyped my assumptions and organised a user test with 6 people (shadowing technique), and did the same for the desktop version. Google Analytics implementation (Events and Conversions definition and actual coding). Gathering detailed requirements and managing the remote developer. Advice on Social Media Strategy, Newsletter email collection. Visit card design on InDesign.
- Delivering UX Audits and recommendations based on best practices for several direct clients and some agencies clients like L'Oréal Professionnel, Hédiard.
- Quick prototyping of a complex software platform and slides content and graphic development for a start-up in order to present the projects to government investors.

UX Design Lecturer

(1 day workshop) - April 2015

Telecom Ecole de Management, Paris, France

In collaboration with the Professor of Marketing, overview of UX design (processes, techniques, tools) followed by the philosophy and practise "learning by doing". Theme: Online Glasses e-Commerce. User Interviews, Personas creation, Storyboarding, Card Sorting, Wireframing/Prototyping and User Testing.

Creative Business Developer

(2,5 years) - January 2015 to present

PM Screen (3D Multimedia Installations - Augmented Reality), France & UK

Brand ambassador in France and Inbound/outbound sales: prospecting on LinkedIn, cold calling, events networking, defining custom prices and proposals, negotiation, closing. Implementation of a CRM.

UX Designer

(6 months) - May to November 2014

Cegedim Relationship Manager (Cegedim Group) – Boulogne, France

Lead Designer for the conception of a new Marketing Multi-Channel Intelligent Platform for Life Science Companies to improve their segmentation challenges:

- Organisation of a brainstorming workshop with high-level stakeholders and top developers to generate ideas on a specific pain point
- Creation of Personas with interviewing stakeholders and own research
- Working with the Product Managers and developers to define scope, flows, technological solutions
- Building a complex interactive prototype in Axure and iterative testing with internal stakeholders

Interaction Designer

(3,5 years) - January 2011 to April 2014

eFinancialCareers.com (DICE Group) – London, United Kingdom

Lead designer from user research to final designs for eFinancialCareers, a global career site specialised in finance, banking and insurance with a monthly average of 20 million page views and 2.7 million visits, and in 5 different languages.

- Designing the first mobile web app for job search and users' accounts, integrating the launch of a new company branding. Prototyping an interactive version of the app including all flows and complex interactions of the existing desktop site, implementing the BETA version with developers and organising a global user testing in 3 world regions with the shadowing technique, collecting information from a survey, amendments based on the testing results.
- Redesigning and improving the user's accounts (Internal users, Clients and Jobseekers) with new and existing features (i.e. New Jobseeker Profile) from Product, Interaction UX to visual design to a new Java based platform.
- Redesigning the news and career advice section from initial requirements, user research to final delivery.
- Adapting the jobseeker platform to fit Chinese audience, with remote user testing observations.
- Finalising visual designs of the admin Job Search site according to new company branding, consolidating interactions and UX matching the new mobile web app
- Redesigning the current Recruiter Centre for a Wordpress platform to drive leads
- Full Product Design of the media centre in Wordpress from initial requirements from stakeholders to final delivery
